What is GNU+Linux?

Just like Windows, iOS, and Mac OS, GNU+Linux is an operating system. In fact, one of the most popular platforms on the planet, Android, is powered by the GNU+Linux operating system. An operating system is software that manages all of the hardware resources associated with your desktop or laptop.

3 Reasons to use GNU+Linux:

- reason 1: it is open source which will allow you to freely use, study, change, and distribute the software and its source code to anyone and for any purpose
- reason 2: it is free you can install it without any risks
- reason 3: it runs on any hardware such as windows, macs, windows tablets, even gaming consoles
